

KOMPRIIMO

the smart basket

Komprimo is a product distributed by **ESSE SERVICE srl**

KOMPRIMO

is an innovative waste compactor with the size of a standard household bin, Komprimo compresses waste by up to 70% and can hold more than Three times more than an ordinary dustbin.

Magic? Absolutely!

1 Throw the garbage

2 Compress!

3 Room for more

E nvironment

designed to be a sustainable product without electrical or hydraulic components. If we compress our garbage indoors, it will take longer time to fill up the outdoor bin. This means less transport, less pollution, less noise and less plastic bags to be used to wrap the garbage.

C lever

Get your kitchen cupboard in order and make it more hygienic. Reduce the waste outside in your bins, and reduce the risk of vermin infestations. By using Komprimo, you will reduce your trips to the outside wastebin considerably.

P atent

The patented compressing system is unique and the only system today which keeps the waste compressed for as long as needed.

The uniquely designed lid and the curved shape, combined with durable materials, gives Komprimo a surprisingly high degree of compression!
